DIGITAL FORENSICS

INSTRUCTOR INFORMATION

- Instructor : Yau Ka Cheung
- Office Location : RELLIS ACB1 Room 335
- Office Hours : Tue & Thu: 13:30 – 16:00
- Email : Yauka.Cheung@etamu.edu
- Preferred Form of Communication : Email
- Communication Response Time : 1-2 days

COURSE DESCRIPTION

- This course provides an in-depth analysis use of industry tools, technologies and practices involved in gathering, protecting and analyzing digital evidence. The class uses industry tools to perform forensic analysis and examines how various operating systems store data on storage media—hard disk drives and other digital media. The course will highlight how computers are used in crimes and how this can be linked to criminal motivations to focus a digital investigation.

LEARNING OUTCOMES

- Summarize the basic principles of computer forensics.
- Describe various computer crimes and how they are investigated.
- Describe digital forensics methodology and labs.
- Outline the proper approach to collecting, seizing, and protecting evidence.
- Explain techniques for hiding and scrambling information as well as how data is recovered.

LEARNING OUTCOMES

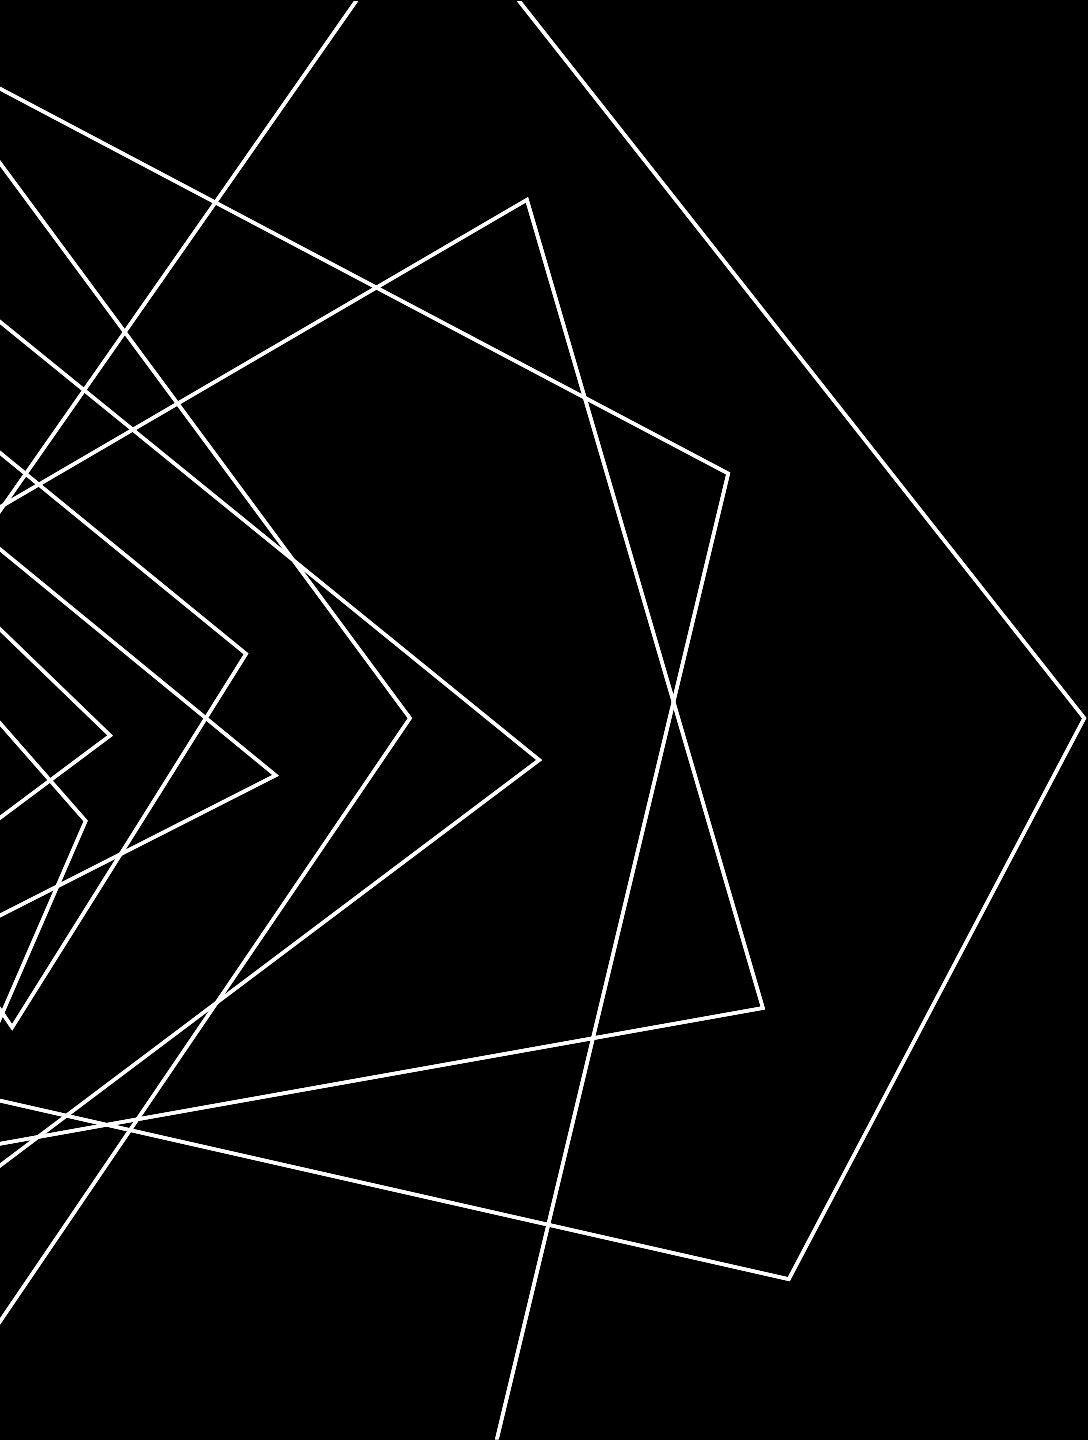

- Summarize various types of digital forensics.
- Explain how to perform a network analysis.
- Describe incident and intrusion response.
- Identify trends in and resources for digital forensics.

TEXTBOOK

- Not required
- SYSTEM FORENSICS, INVEST & RESP W/ACCES, 3RD, EASTTOM

ASSESSMENTS

- Assignments 50%
- Project 10%
- Quiz 10%
- Exam 30%
- TOTAL 100%

THANK YOU
